Task-1

I created a digital literacy awareness infographic using Canva. I chose Canva because it is simple to use and provides many ready-made templates which made designing easier. In my infographic, I focused on three main areas: what digital literacy means, some commonly used digital tools, and why digital literacy is important in our daily life.

In the first section, I explained that digital literacy is the ability to use digital devices effectively and safely, and how it helps in communication and learning. In the second section, I included examples of tools like YouTube, Google Drive, and ChatGPT, which students use regularly for studying and sharing information. In the last section, I highlighted why digital literacy matters, such as improving career opportunities, helping in smart learning, and keeping users safe online.

While making this design, one difficulty I faced was arranging the content properly so that it looks clean and not overcrowded. However, this task helped me understand how important digital literacy is and how we can present information in a simple and visual way.
